

PROJECT REQUIREMENT DOCUMENT (PRD)

Project Name: Mahila-Shakti Unnati (Android App Development using GenAI)

Domain: Fintech / Micro-Finance for Self-Help Groups (SHGs)

1. Project Objective

The objective of Mahila-Shakti Unnati is to empower rural women by replacing manual registers with a digital ledger. The app serves as a "Digital Accountant" to track savings, manage loans, and eliminate financial disputes within Self-Help Groups.

2. Functional Requirements

- **Member Management:** Ability to add/edit members with personal details and profile photographs.
- **Savings Management:** A weekly ledger to mark "Paid" or "Pending" contributions with real-time total updates.
- **Loan Tracking:** Systems to record loan disbursement, calculate interest (Simple Interest), and track repayment history.
- **Data Export:** A feature to generate a text-based summary of group finances to be shared via WhatsApp using Android Intents.

3. Technical Specifications

- **Platform:** Android (Kotlin-based development).
- **Local Database:** Implementation of Room DB using One-to-Many relationships between members and financial entries.
- **Validation Logic:** Hardcoded rules to prevent multiple active loans per member and ensure database integrity during migrations.
- **UI/UX:** A simple, intuitive interface designed for users with varying levels of digital literacy.

4. Business Rules & Success Criteria

- Total group savings must update dynamically upon every transaction.
- Zero-concurrency on loans: New loans are blocked if an existing debt is recorded.
- Data must be exportable in a human-readable string format for social sharing.

5. Social Impact Goals

- Increase financial literacy among rural women regarding interest rates and credit.
- Foster community transparency through digitized, immutable records.
- Promote digital inclusion by providing accessible fintech tools to the grassroots level.
